Professional Summary

AI & Data Science undergraduate with a CGPA of 9.5/10, skilled in Java, Python, Data Structures & Algorithms, Machine Learning, NLP, and Full-Stack Development. Built AI-powered applications and web solutions using Spring Boot, React, MySQL, and Scikit-learn, including a Cyber Threat Detection System for spam and phishing email detection.

Student, Academic & Self Projects

- Developed machine learning models for Fake News Detection and Sentiment Analysis using text classification techniques.
- Performed data preprocessing, feature extraction, and model evaluation to improve model performance.
- Implemented Natural Language Processing (NLP) techniques for text analysis and classification.
- Integrated React frontend with Spring Boot REST APIs to enable end-to-end application functionality.
- Built and tested backend services for handling data processing and application logic.

Education

Bachelor of Technology – Artificial Intelligence, <i>Koneru Lakshmaiah College of Engineering</i> CGPA: 9.5/10	06/2024 – 05/2028 Hyderabad
Intermediate (MPC), <i>Sri Chaitanya Junior College</i> 91.5Percentage	06/2022 – 06/2024 hyderabad,India

Technical Skills

Languages: Java, Python, JavaScript
DSA: Arrays, Linked Lists, Trees, Graphs, Dynamic Programming
ML/AI: Machine Learning, NLP, Pandas, NumPy, Scikit-learn
Web: React, HTML, CSS, Spring Boot, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, Postman

Projects

Fake News Detection System • Built a text classification model to identify fake and real news articles.	12/2025 – 01/2026
Sentiment Analysis System • Classified text into Positive, Negative, and Neutral sentiments.	10/2025 – 12/2025
Full Stack CRUD Web Application • Developed a full-stack application with REST APIs and database integration.	08/2025 – 11/2025
Food Delivery Application (Web & Mobile) • Developed a full-stack food delivery platform enabling users to browse menus, place orders, and manage deliveries.	02/2026

Cyber Threat Detection System

- Developed a cybersecurity solution to detect spam, phishing, and malicious emails through content and threat analysis.
- Implemented email inspection, URL analysis, and text-based threat detection techniques to identify potential cyber attacks.

Certifications

- | | | |
|--|--|--|
| • Python for Data Science – NPTEL | • Solutions Architecture Job Simulation – Forage | • Cybersecurity Fundamentals – Simplilearn |
| • MongoDB Certified Developer Associate (Python) | | |
